His girlfriend Pamela Courson stated that Morrison had died of a heroin overdose, having inhaled what he believed to be cocaine.

On the other hand, it should be made clear to pharmaceuticals that ex-post evidence is as crucial as ex-ante evidence in proving the value of a new treatment.

I can at this time look forward to my future.

1 tab is for 11lbs (5kg) so I can split one in 5 bits and give 1 bit each day, they recommend pulverizing it and mixing it with fluids.
